### ***Description / Details:***

Winelco Inc. has been providing water and wastewater contract operator services since 1970. We are presently looking for a reliable, self-motivated individual with a good driving record to provide water and/or wastewater operator and maintenance duties for our many commercial clients. Most of our clients are located in southwest and central Ohio. The job entails driving to several locations each day and fulfilling the Certified Operator staffing requirements of the OEPA as well as performing the varied tasks to ensure that the systems are operating to the best of their ability. These privately owned water and wastewater treatment systems vary in size from 2,000 to 100,000 gpd. This position is suitable for Class I - III experienced operators as well as for someone just starting out. This position is a good match for an individual who prefers multiple responsibilities and prefers working at multiple sites on a daily basis as opposed to reporting to a single location. To learn more contact Dan Ullman, danullman@winelco.com, (513) 755-8050.
